**VALUATION POLICY**

In general, properties are subject to an independent valuation at least every three years. For those properties classified as investment properties the independent valuations are undertaken every reporting period (30 June and 31 December).

A certain number of properties have not been subject to an independent valuation. These properties are reported at their book value (being the written down value or carrying value).

**VALUATION UNCERTAINTY**

The independent valuations relating to the Group’s property portfolio includes a majority of independent valuations that were undertaken before the impact of COVID-19. As a result, the assumptions should be considered on the basis that there may be ‘material valuation uncertainty’, and therefore less certainty should be attached to the independent valuations than would normally be the case.
